## COMPANY Profile

Corner Music Inc. was opened in 1976 to meet the needs of local musicians, songwriters, and recording professionals. Through the years, Corner Music has come to be recognized as the leading source for professional musical equipment in the Nashville area.

In the mid 80's Corner Audio-Video was created to address the demand for high-quality multimedia production systems in Houses of Worship.

While music venues and touring artists used multi-channel, pro-level sound systems, church sound systems were still largely based on the voice-only public address paging systems of the 50's and 60's. As churches began to incorporate a wider spectrum of music styles and media presentations their services, their audio system and video system requirements demanded change as well. The need for greater clarity and impact was quickly becoming the standard for those churches desiring to remain culturally relevant to their congregations.

Because of Corner Music's years of experience with the design and installation of systems for studios, touring artists, and musical venues, the offering of this expertise was a natural progression in our service to the Nashville community and beyond.

## System Design

The performance characteristics of any production system, whether it be audio, video, or lighting is ultimately the result of intuitive designers. Our years of experience, coupled with the most innovative products and design philosophies allow us to deliver turn-key systems that work perfectly from day one.

Our ability to offer systems that fit our client's needs now and in the future is a source of pride for us. As part of the design process, we evaluate each situation individually and provide tailor made solutions that are high-quality, effective and affordable. Whether you're congregation is five, five hundred, or five thousand, we offer systems for every size venue and budget.

## Installation

Not only do we design and sell great production systems, we also install them. Corner Audio Video employs some of the most experienced and well-trained installers in the business. We do not outsource our installations. What you will see once your installation is complete are cleanly installed components. What you will not see are obtrusive brackets, loose wiring, or damage to you facility. We take great pride in our installation prowess, so much so that we often hear comments like "where are all the wires hidden?"

## Repair

Like automobiles; production systems are complex, and subject to occasional problems without notice. If a church system develops a problem, or has a failure of some sort, repair of that system is of urgent importance. Under most circumstances, we can provide repair or replacement of defective components within a very short time frame. We'll do everything possible to keep you up and running for your next service quickly & economically!

## Training

Installing a new system can be a very exciting time. However, improvements in equipment design often bring changes in how you operate it. Part of our service is to ensure our clients understand how their systems function in order to release its full potential. We offer basic training, specific to your system, as a part of our installation package at no additional cost AND an affordable in depth follow-up seminar that has been very well received. Our goal is for you to become comfortable with all those knobs, lights, and switches!

## It's About Service

Obviously, you have many choices when it comes to companies offering production systems. So what sets us apart from the rest? It really is the service. We are here to serve you, and your needs. From start to finish, we strive to make your experience with us; one that will make you want to call us any time the need may arise and refer us to others. We want to be your production company, and we'll bend over backwards to prove it!
